Stewardship

Engagement & Voting

- At Sanlam Investments, our stewardship activities forms a key component of our ESG framework and it encompasses two important areas- engaging with companies on material ESG issues and exercising our right to vote.
- When engaging with companies our purpose is to either seek additional understanding or, where necessary, to seek change that will protect and enhance the value of investments for which we are responsible.
- Our Corporate Governance unit provides oversight on matters relating to engagements along with the setting and prioritizing efforts
